

SPIRAL GRAB

The **LiMAR®** Spiral Grab is designed to be rotated into Slickline, Cable, Control Line and Capillary Tubing in order to retrieve such items from the Well-Bore.

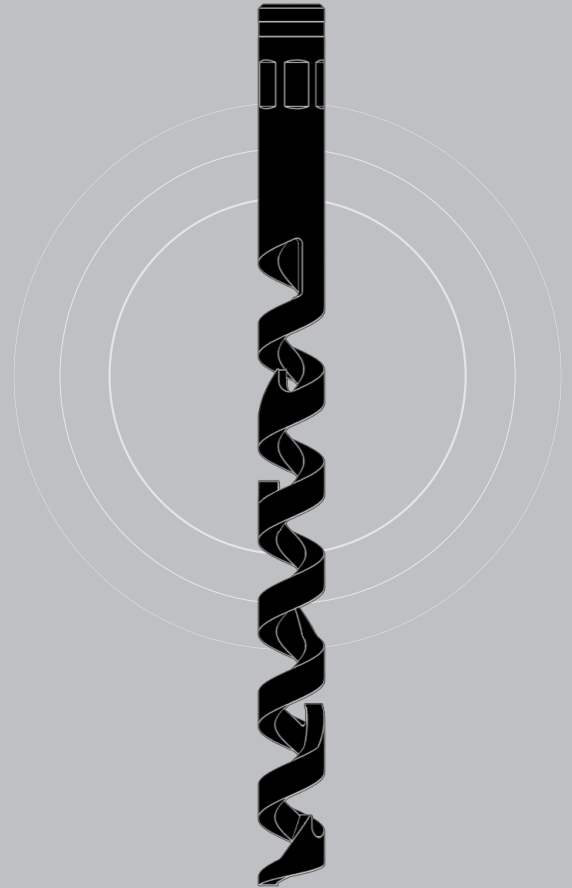

As the Spiral Grab is screwed into compacted Wire it will tend to loosen the Wire and work it's way into a "Birdnest" rather than compact it further as can be the case with other Wire Fishing Tools.

TOOL APPLICATIONS:

- Fishing compacted Wire, Cable, Control Line and Capillary Tubing

DESIGN FEATURES & BENEFITS:

- Available in a wide range of OD's to suit all completion sizes
- Screws into the Fish to prevent further compaction
- Series of Barbs machined into the Grab to secure the Fish
- Manufactured from a single piece of Alloy Steel
- Connection options to suit customer requirements
- Bespoke designs to suit customer requirements

TECHNICAL DATA

372 - Spiral Grab

Spiral Grabs are available in a range of diameters and thread connections to suit client requirements.
